Call for Papers

The 9th International Meeting on Fully Three-Dimensional Image Reconstruction in Radiology and Nuclear Medicine is dedicated to problems related to tomography in radiology and nuclear medicine. It is a friendly, informal, workshop-style meeting where most experts in this field come together. The participants, far more than hundred scientists, researchers and students, have the unique chance to present, discuss and understand the latest techniques of image reconstruction. The fact that nearly all major advances in tomographic image reconstruction have been first presented at the 3D meeting emphasizes the high relevance of the meeting. Fully 3D 2007 is the ninth in a successful series of biennial meetings.

To complement the Fully 3D meeting the [first Workshop on High-Performance Image Reconstruction](#) will review hardware-based image reconstruction acceleration techniques and provide insight in the latest developments.

Paper Submission

We cordially invite you to participate in the conference and the symposium as well as in the social events. February 1 is the deadline for submission of the 4-page abstracts.

Details about the abstract submission as well as the meeting in general can be found at the conference homepage www.fully3d.org.

Important Dates
